

Use three strands of embroidery thread throughout. A four inch embroidery hoop recommended.

Satin stitch is often used to create a dense covering of embroidery. Bring the needle up at the starting point of your shape. Bring your needle down on the opposite side of the shape, covering it with a long stitch. Bring your needle up on the side you began, next to the stitch you just made. Bring the needle down on the opposite side again, next to the previous stitch. Continue in this way until the shape is covered.
